WHAT'S THE COST OF NON-COMPLIANCE TO YOUR ORGANISATION?

workday | Select Partner

How much is risk truly costing your business? The costs associated with regulatory non-compliance significantly exceed the cost of compliance.

This easy-to-use calculator is designed to help you start a realistic conversation about the business case for **Workday** compliance technology.

It provides you with an estimate on how much you could save, or avoid, per year by investing in **Workday** control automation.

Just enter some basic information about your current risk and compliance landscape to get your instant result.

[Calculate my non-compliance savings now](#)

These calculations are based on **direct and indirect costs of non-compliance that can be reasonably estimated**. Other significant indirect costs such as reputational damage and business disruption are not estimated in the final calculation.

Data Privacy Considerations

Privacy risk is affected by your industry, the type of data you handle and where you do business. **Rate your perceived level of data privacy risk exposure** based on your industry and geographical presence. Industries subject to Protected Health Information (PHI), Personally identifiable information (PII) and data privacy regulations like the General Data Protection Regulation (GDPR) or California Consumer Privacy Act (CCPA) have higher risk profiles.

Streamlined Audit Support

Compliance technology can help streamline the audit process, improve audit outcomes, and increase operational productivity. **How many times per year do you support Workday audits over IT general controls** including security, access, configuration control and privacy? Count each round of interim, remediation, and year-end testing individually.
